La Linea Sedia Srl con il marchio Di Lazzaro Casa viene fondata 65 anni fa a Mosciano Sant'Angelo, Teramo, nel cuore della regione italiana degli Abruzzi. Da sempre produce tavoli, sedie e complementi d'arredo contemporanei in stile moderno. Attualmente è gestita da Silvestro ed Alessandro Di Lazzaro, che rappresentano la seconda generazione di imprenditori. La catena del prodotto, dalla concezione, all'industrializzazione, alla produzione sia interna che esterna, fino al controllo di qualità, viene svolta interamente in Italia, in modo da poter garantire e preservare la tipica caratteristica del "saper fare" Italiano e dell'importanza del tipico Made in Italy, riuscendo così a dare continuità alle capacità artigianali che spesso vengono anche declinate nella produzione industriale, senza però essere snaturate. I prodotti hanno una connotazione moderna, contemporanea ed attenta alle richieste delle tendenze dell'abitare attuale in costante trasformazione. Il consumatore e le sue necessità, rapportate al modo di vivere gli spazi abitativi in continuo cambiamento e mutazione, fanno sì che, alla Di Lazzaro Casa, il design sia inteso come dialogo tra forme piacevoli e funzione, con l'obiettivo primario di poter avere un utilizzo quotidiano del prodotto. Allo stesso tempo il prodotto deve poter esprimere in libertà la sua personalità ed il suo carattere nell'ambiente abitativo, senza però mai sopraffare le caratteristiche della persona che lo utilizza, dando l'opportunità all'utilizzatore di identificarsi nello stile di vita proposto. OUR HISTORY

Linea Sedia Srl with the brand Di Lazzaro Casa was founded 65 years ago in Mosciano Sant'Angelo, Teramo, in the heart of the Italian region of Abruzzi. Since the foundation is specialized in production of tables, chairs and contemporary furnishings in a modern style. Currently, it is managed by Silvestro and Alessandro Di Lazzaro, who represent the second generation of entrepreneurs. The production chain, from conception, to the industrialization, through in-house and outsourcing production, up to quality control, is carried out entirely in Italy. These activities guarantee and preserve the typical characteristic of the Italian "know-how" and the importance of the typical Made in Italy, giving the necessary continuity to the craft skills that are often also included in industrial production, without being distorted. At the same time, the product must be able to freely express its personality and character in the living environment, but without ever overwhelming the characteristics of the person who uses it, giving the user the opportunity to identify himself with the proposed lifestyle.
